CASE STUDY · DEFENSE

Demolition and disposal of a retired Nortel SL-100 telephone switch at Niagara Falls Air Reserve Station

Decommissioned the retired Nortel SL-100 telephone switch in an Air Force Reserve communications building, from cabinet demolition through documented disposal, during September and October 2024.

CLIENT

Department of the Air Force, Air Force Reserve Command, Niagara Falls Air Reserve Station, New York

60 days Calendar period of performance

REQUIREMENTS

Operational need. The station required its retired SL-100 switch cabinets demolished, removed from the communications building and disposed of.

Disposal accountability. Removed material had to be recorded on the waste and recyclable material log attached to the performance work statement.

SOLUTION DELIVERED

Switch decommissioning and disposal

Demolished and removed the SL-100 cabinets and disposed of the material under military protocols and federal environmental standards.

Asset accountability

Tracked and documented removed assets in accordance with DoD guidelines.

DELIVERY ASSURANCE

✓ Removal coordinated with Air Force personnel to limit communications downtime.
