CASE STUDY · DEFENSE

Decommissioning and removal of 51 legacy Nortel telecommunications cabinets from three Air Force Test Center sites

Decommissioned legacy Nortel telecommunications switching equipment, with its battery plant power cabling and line cabling, across three Eglin AFB sites within a 46-day period of performance.

CLIENT

Department of the Air Force, Air Force Materiel Command, Air Force Test Center, Eglin AFB, Florida

51 Legacy Nortel cabinets removed

3 sites Host facility and two remote sites

46 days Period of performance

REQUIREMENTS

 **Operational need.** The Air Force Test Center required retired Nortel switching equipment and its cabling decommissioned and removed from Eglin AFB.

 **Site condition.** The MDF frames and the power plant remained in service throughout the removal.

SOLUTION DELIVERED

Switching equipment decommissioning

Decommissioned and removed 51 Nortel cabinets and associated infrastructure from the host facility and two remote sites.

Cable plant decommissioning

Removed power cabling to the battery plant and cleared line cabling back to the main distribution frame (MDF).

Project closeout

Submitted the final project deliverable and closeout documentation with post-removal photographs.
